### Stand:

On Saturday July 11, 2020, a call was received from Fort Erie race office informing that Trainer Ken Albu had entered the horse Master Connor, the original race did not fill and it was requested on his entry to an alternate race. This was missed by race office staff and the horse was added to the outside post position in race (6) as per TB Rule 6.39.

On June 23, the horse Flatoutonamission, 7<sup>th</sup> race, did not receive the medication, furosemide, at the required time necessitating a scratch. The Chief Test Inspector, Meghaen McGirr, informed the Stewards that the horse did not appear on the Medication Administration Record (MAR) and therefore missed in the administration. There were two horses in the 7th race that did not appear on the MAR the other was not on the EIPH program. After speaking with the parties involved, Trainer Sandra Dominquez, CTI Meghaen McGirr and Racing Forensics Jane Rutherford, it was determined that this was a clerical error, the 3rd page of the Record did not print and therefore the name of the horse did not appear on the admin record. It was determined that the CTI is to cross reference all horses listed in the Official Program to ensure the names of all horses to receive Furosemide are accounted for. No penalty assessed. Spoke with the Tom Valiquette of FELRC Association, the telephone in Test area has been fixed and is operational, the race office staff to have access to a radio to contact Test Barn Technicians when needed.

It was observed by the Stewards that a few people were on the Grandstand side of the racetrack watching the races. We enquired as to who they may be and it was relayed to us that Fort Erie has a criteria for one owner and a friend to attend the front side during races as long as they register with Marketing and have their horse running that day.
